

Here are the answers for the Relationships PowerPoint from Tuesday,
April 28, 2020.

1. Define relationship.

A relationship is the way in which two or more concepts, objects, or people are connected.

2. A question asks you to find the relationship between two items. What should you do in order to answer this question?

Read the question carefully.

Figure out what two items you are trying to find a relationship between.

Find these two items throughout the text. (skim and scan)

Figure out how the two items interact, relate, or connect.

3. What is a common relationship between your ELA and Math teacher?

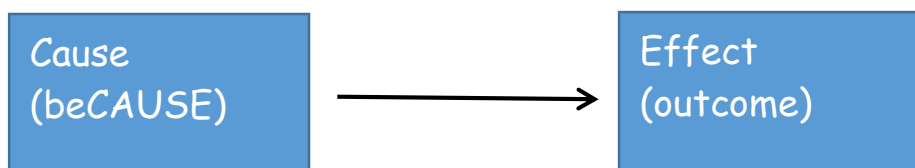

My ELA teacher and Math teacher are both teachers who work together on the same team.

4. What cause and effect chant will help you remember the difference between the two?

The cause, the cause, it makes something happen.

The effect, the effect, what happens as a result.

5. Draw the graphic organizer you should use when trying to determine the cause and effect.

6. What is the relationship between an opinion essay and main idea/explanatory essay?

Opinion essays and main idea/explanatory essays are two types of essays that deal with facts and information.
